Enterprise Options

None of the options above work for you? No problem! [Contact Us](#) to hear about our enterprise options.

Storage

- You can stream content from YouTube, Vimeo, Avalon, or SoundCloud directly into Aviary for no extra storage costs. Aviary just uses the embed codes that you provide from those 3rd party services.
- If you would like to store audio or video files in Aviary for streaming directly from Aviary, you can utilize Aviary storage on Wasabi (and soon also Amazon S3). Wasabi costs \$0.0052 per GB/month (\$5.24 per TB/month) for storage of audio and video files. Aviary will calculate your monthly storage usage from Wasabi and bill you directly for this cost using the payment method you have designated for your subscription to Aviary. Storage costs are billed monthly, even if you select a yearly subscription.
